

**OSAnet** is an Italian ICT company based in Sicily since 2001. The Company SW solutions have been used extensively in several large Public Administration Entities as well as commercial Companies throughout Italy. OSAnet provides an extremely high level of service and Product.

**OSAnet is:**

- registered to the CCIAA of Catania and to the Supplier Register of the Sicilian Region;
- associated to CONFAPI Sicilia, ETNA VALLEY PRODUCTIVE DISTRICT, UNIMATICA;
- part of the Italian e- Public Administration Market Place "CONSHIP";
- an ICT Service Provider (Installation, Training and Maintenance);
- a PRODUCTION and SALE's company of "ad HOC SW solutions" which are reliable, tested and immediately available. In addition, OSAnet can realize "ex novo solutions" or can integrate the existing products in its portfolio offer, with innovative technology such as RFID or Energy Management.

**CERTIFICATIONS**

- AUDIT for the DIRCE Project (Diffusion Innovation Research Economic Competitiveness) asked by the MIUR and led by the Tagliacarne Institute of Rome.
- ISO 9001:2008.
- CISCO

**MAIN REFERENCES**

Italian Public Administration; Universities; Consortiums; Port Authorities; Civil Defence; Scholarship; Banco di Sicilia; Event Organiser-Management Companies; Services Implementations Companies.

**PARTNERSHIP**

- OSAnet is particularly sensitive towards PARTNERSHIP's propositions in order to market some of their SW solutions internationally. On this purpose, english sw versions are already made and tested.
- In Sicily, OSAnet is the only reference of CASPUR, (Universities Research Consortium), for Bibliographical Archives recover.
- DELISA Sud and SISECO are private business partners.

**OSAnet Main Solutions**

**GeDeAs**  
It's today's "standard de facto" for the Regional Credit Orders management in Sicily. GEDNAZ is the National version for the other Regions in Italy, as Sicily has a Special Regional Government.

**Gebemo**  
That's an inventory management sw solution, integrated on demand, with barcode and RFID technology. It helps the User in saving weeks of work in inventory reconciliation, management, etc.

**OSACed**  
Helps the ICT Resources Manager (of Private Companies or of Public Administration), in activities such as: ICT inventory reconciliation; management; assistance and maintenance; trouble ticketing, etc. On demand, integration with RFID technology, makes possible to establish within minutes the exact physical asset holdings of the user company from the comfort of its own central office. Integration with energy management system can save money on electricity.

**OSAm**  
It's an easy CRM solution for SMEs. It's a quality management system strategic for those Companies that need to be competitive or for those Companies which provide pre and post-sale services.

**e-GeRePos Web**  
Is a very simple and advanced sw solution for the scholarships management. It's mostly used by the Government Educational Department and by Public Schools.
